

# Dmytro Pozniakov

Front-End developer

I am a Front-End Developer with solid experience in building responsive and user-centric web applications using Vue.js. I work confidently with JavaScript, Vuex for efficient state management, and REST APIs for dynamic data integration. My frontend toolkit includes semantic HTML, CSS, SASS, and Git for version control. I write clean and maintainable code, and enjoy both independent and collaborative work. I'm always eager to learn and stay current with new front-end technologies and trends.
